Engine Torque Specifications - TorkSpec

All compressors have an engine and motor component. That motor drives a crankshaft which moves pistons that produce the compressed air through an intricate mechanical process. As with automotive engines, we measure the amount of work the motor can perform in horsepower. One horsepower is equal to 550 foot-pounds per second, or 745.7 watts.

Air Compressor Motor and Horsepower | Quincy Compressor

We also note the compliance with environmental standards Euro 4. The 6G74 engine, unlike most other power units produced in the eighties and nineties of the last century, was originally developed for use on 95 gasoline. Therefore, attempts to fill 6G74 with low-octane fuel invariably led to breakdowns of this power unit.
