Match each description to the appropriate biome. tropical savanna desert tropical rain forest taiga tundra has sparse vegetation and very cold temperatures located near the equator and contains trees that form dense canopy layers is very hot and dry, and has plants that need little water has cold winters, heavy snowfall and is dominated by conifers has warm temperatures and is dominated by grasses

Name three types of adaptation

The similarities and differences you give must be clear so to do this make sure your statements are comparative, which means you address both things you are comparing - this one does this, but this one does not. It is possible to get all the marks by listing just similarities or just differences, but always try to give at least one of each.
