How to Bleed your Brakes by Yourself
The rod is supposed to be adjusted longer until there is no squirt of brake fluid coming up in the reservoir when you step on the brake pedal. Then shorten it until there is a squirt coming up when you push the pedal. Then you bleed the wheel cylinders until there is no air or foam coming out of them.

After bleeding the brake calipers and cylinders the rear brake by-pass line must also be bled. Open a front caliper bleed fitting and depress the brake pedal to the floor. This will shuttle the by-pass differential valve and allow fluid to flow through the by-pass line.

Brake adjustment - The CJ2A Page Forums

In this video, I create my own brake bleeding tool out of a soda bottle and some vinyl tubing and bleed all four wheels of my pick up truck. It's a pretty simple process to flush the brake system.

Brake Lines for Jeep Grand Wagoneer for sale
| eBay

Put new calipers on. I broke a brake line while trying to bleed them, so i replaced that. I bled the brakes again, but there was no brake after that. So i replaced the master cylinder, and rebled, but still no brakes! There is no brake light on. other than the ABS which was already on way before even taking the brakes apart to replace them.
