Guidelines for HIV Counselling and Testing in Ethiopia

Recognizing the urgent need for antiretroviral treatment, the Government of Ethiopia (GOE) issued the first antiretroviral (ARV) guidelines in 2003, which were revised in 2005 to facilitate a rapid scale up of ART. Within two years, patients on treatment at 117 hospitals and 108 health centres increased from 900 to 62,221.

Ethiopia Malaria Operational Plan FY 2018 - PMI

Ethiopia is currently decentralizing HIV care and treatment services to selected health centres. Decentralization increases access by taking services closer to more people, reducing transport and related costs for patients and families, resulting in improved adherence and enrolment in care and treatment services early in the course of the disease.
