Heat Treated Lumber Supply | Industrial & Wholesale Lumber

- A variety of high-intensity heat transfer processes are involved with combustion and chemical reaction in the gasifier unit itself.
- The gas goes through various cleanup and pipe-delivery processes to get to our stoves. The heat transfer processes involved in the stages are generally less intense.

AHeatTransferTextbook - University of Thessaly

Heat is the energy transferred between two systems that have different temperatures. The mechanism of heat transfer is molecular collisions at the boundary between the two systems. Work, heat, and thermal energy can be transformed into each other in accordance with the first law of thermodynamics, $\Delta E_{th} = W + Q$.
