Gene-culture coevolution and the nature of human sociality

From genes, to religion, to cultures, our complex human natures are unraveled and put before us to see and recognize as the wonder they are. Evolution of the human species is explained in the timeframe and the manner supported by the best scientific evidence of the day. Yet, the wonder and mystery of sentient beings is not in any way denigrated.

How human culture influences our genetics - BBC Future

Gene-culture coevolution is the application of niche-construction reasoning to the human species, recognizing that both genes and culture are subject to similar dynamics, and
